

EDUCATION

Northeastern University	Sept 2023 — Dec 2025
Master of Science in Information Systems	
Basaveshwar Engineering College, KA, IN.	Aug 2016 — May 2020
Bachelors of Engineering in Computer Science and Engineering.	

SKILLS

Languages	C/C++, Java, Python, JavaScript, TypeScript, HTML, CSS
Frameworks & Tools	React, Angular, Next.js, Fast API, RESTful APIs, Spring MVC, SpringBoot, Microservices, Flask API, Node.js, ASP.NET, Docker, Kubernetes, Git, Bootstrap, React Native, Storybook, CI/CD, Jenkins
Cloud Services	AWS (EC2, S3, RDS, Lambda, CloudFormation), Microsoft Azure, Oracle Cloud Infrastructure
Databases	MySQL, PostgreSQL, Snowflake, MongoDB, DynamoDB, Vector Databases (ChromaDB, Pinecone)
Testing & Monitoring	Jest, Playwright, CloudWatch, Grafana, Prometheus, Chrome DevTools
Machine Learning & AI	vLLM, Ollama, LangChain, Llama Index, RAG Systems, Knowledge Graphs, Qdrant, HuggingFace Trans-formers, GPU Inference Optimization (CUDA,TensorRT),Multi-AgentSystems, Prompt Engineering

TECHNICAL EXPERIENCE

LendBuzz	Boston, MA
Frontend Engineering Co-op	Jan 2025 — Aug 2025

- Designed and built responsive **GPS Access Page** from **Figma** using **Next.js, TypeScript, React Hooks, and Storybook**, improving usability for **100+** users
- Integrated **Google Maps API** with draggable UI for real-time **geolocation and device tracking**, boosting engagement by **30%**
- Developed **knowledge graph chatbot** to automate loan eligibility checks, reducing manual underwriting time by **30%**
- Built scalable **Spring Boot & Nest.js APIs** for loan workflows, enabling secure data integration with financial systems
- Optimized performance using **Chrome DevTools, Lighthouse, Web Vitals**, cutting page load times and improving accessibility scores
- Instrumented applications with **Sentry error tracking** and dashboards, reducing production issue resolution time
- Developed token validation service with **Python/Flask**, deployed via **AWS Lambda + CI/CD** for scale

Northeastern University	Boston, MA
Software Development Research Assistant	Oct 2024 — Present

- Deployed **Gemma 3.7B** and **Mistral 7B (Ollama)** on NVIDIA Blackwell Pro GPU to build an end-to-end grading platform for exams and assignments with real-time inference and rubric-based feedback.
- Developed **Voice Coach AI**, a SaaS with React.js/Node.js + Whisper ASR, boosting student engagement by **45%**
- Led the development of a real-time LLM based **ChatBotAI** serving **100+ users** using **Node.js, Express.js, Socket.io, and React**
- Engineered a **monitoring dashboard** in **Next.js** to visualize **GPU metrics** across distributed nodes, reducing issue diagnosis time by **45%**.
- Developed **AI AgentWorld**, a multi-agent simulation platform with dynamic persona interactions powered by **Qdrant, WebSockets, and MCP**, improving interaction speed by **25%**.

NTT Data Services	Bangalore, IN
Information Technology Senior Associate	Jul 2021 — Aug 2023

- Led development of **React/Next.js** interfaces integrated with Spring Boot APIs, boosting task speed by **45%**.
- Built **API gateway routing, error handling, and latency monitoring** for distributed services.
- Diagnosed and resolved **production latency issues** using log analytics and refactoring, improving API response time by **35%**.
- Engineered CI/CD architecture using **Jenkins and Docker** to automate service deployments, reducing release time by **30%**.

PROJECTS

Cloud-Native Microservices: GKE, Kubernetes, Docker Orchestration
Orchestrated Kubernetes infrastructure on GKE using Helm Charts and CI/CD pipelines in Jenkins, enabling secure deployments through a Terraform-provisioned private EKS cluster.
Developed Custom Kubernetes Resources and CronJobs using Go-based Operators for automated workload management and event-driven scheduling.
Deployed Kafka on GKE via Helm Charts to implement asynchronous publish/subscribe messaging across microservices, improving event throughput and reliability by 40% .
ChatGPT Clone with Multi-LLMs
Created a responsive Material UI + React chat interface, integrating 5 LLMs to boost query flexibility by 10%
Built a high-performance Node.js-Express-MongoDB system to streamline LLM responses, reducing latency by 50%
LinkedIn Clone - AI Recommended Jobs
Developed a comprehensive job portal for students using Node.js and React.js , providing a seamless user experience
Devised scalable RESTful APIs to handle job postings, and employer-student interaction, increasing performance by 2x
Built an LLM-powered recommendation engine that improved candidate-job matching accuracy by 40%
