

EDUCATION

Northeastern University	Sept 2023 — Dec 2025
Master of Science in Information Systems	GPA: 3.7
Basaveshwar Engineering College, KA, IN	Aug 2016 — Sept 2020
Bachelor of Engineering in Computer Science and Engineering	

SKILLS

Languages	C/C++, HTML, CSS, JavaScript, TypeScript, Java, Python, Ruby on Rails (basics)
Frameworks & Tools	Next.js, Nest.js, kubernetes, React.js, Angular, Node.js, Git, Docker, Spring Boot Microservices, Apache Kafka, Tailwind CSS, Agile/Scrum methodology, Bootstrap, CI/CD pipelines, Sentry, Figma
Cloud Services	AWS(EC2, S3, DynamoDB, RDS, Lambda, Cloud Formation), Microsoft Azure, Oracle Cloud Infrastructure
Database	MySQL, PostgreSQL, MongoDB (NoSQL), Microsoft Azure Studio, Kaizen DB
AI & ML Technologies	PyTorch, Tensorflow, RAG, Knowledge Graphs, LLMs, GPU Optimization
Testing & Debugging	Jest, Playwright, Chrome DevTools

TECHNICAL EXPERIENCE

LendBuzz	Boston, MA
Software Engineer Co-op	Jan 2025 — Aug 2025

- Built scalable **Spring Boot & Nest.js APIs** for loan workflows, enabling secure integration with financial systems
- Developed a token validation service with Python/Flask, tested in **Jest**, and deployed via **AWS Lambda + CI/CD** for scalability and security
- Designed and built a responsive **GPS module** using **Next.js**, applying **UX patterns** to improve usability for 100+ users
- Integrated **Google Maps API** for real-time tracking and draggable UI, increasing user engagement by 40%
- Engineered a **Graph RAG pipeline** with LLM query generation + Cypher retrieval, improving pre-qualification conversion by 20%
- Streamlined CI/CD workflows by deploying applications on **AWS EC2** through **Jenkins**, reducing deployment time by 60%.
- Instrumented applications with **Sentry error tracking**, **Prometheus** improving monitoring and reducing issue resolution times by 2X
- Optimized frontend performance using **Chrome DevTools** and ensured reliability with **Sentry monitoring** and **Playwright tests**, reducing load times and improving app stability

Northeastern University	Boston, MA
Software Development Research Assistant	Oct 2024 — Feb 2025

- Architected GPU-based infrastructure for LLM-powered apps with **React.js/Node.js**, **Docker**, and **Hugging Face models (Llama-3.2, Gemma-7B)**, improved deployment speed by 40% and reduced infra costs by 25%
- Built scalable **AI-powered grading apps**, increasing grading efficiency by 60% and feedback accuracy by 30%
- Designed interactive **dashboards** for essay and presentation grading, enabling real-time visualization and enhancing usability
- Led development of **Voice Coach AI**, a SaaS with **React.js/Node.js** + Whisper ASR, boosting presentation skills and engagement by 45%
- Automated deployment pipelines with **CI/CD + Docker**, reducing rollout time and ensuring system reliability

NTT Data Services	Bangalore, IN
Information Technology Senior Associate	Jul 2021 — Aug 2023

- Led frontend development of **React/Next.js** interfaces for internal **ERP tools**, cutting task time and reducing error rate
- Collaborated in **Agile/Scrum teams** to engineer Spring Boot REST APIs for invoice automation and Procure-to-Pay workflows, reducing manual processes by 40%
- Debugged and refactored critical** modules via log analysis and modular design, lowering defect recurrence by ~30%

PROJECTS

CineGenie - AI Based Ticket Booking App
Developed an AI-powered movie ticketing app using Node.js , React and MongoDB , achieving 2 times user engagement through personalized recommendations
Integrated AWS S3 for efficient media transfer over secure protocols reducing media load times by 50% , hosted on AWS EC2
ChatGPT Clone with Multi-LLMs
Created a responsive Material UI + React chat interface, integrating 5 LLMs to boost query flexibility by 10%
Built a high-performance Node.js-Express-MongoDB system to streamline LLM responses, reducing latency by 40%
Optimized frontend rendering and message-stream updates with React hooks and async state management , improving chat responsiveness and user experience by 25%
LinkedIn Clone- AI Recommended Jobs
Developed a comprehensive job portal for students using Node.js and React.js , providing a seamless user experience
Engineered RESTful APIs for job postings and student-employer interactions, improving performance and security.
Built an LLM-powered recommendation engine that improved candidate-job matching accuracy by 40%
