

EDUCATION

Northeastern University	Sept 2023 — Dec 2025
Master of Science in Information Systems	
Basaveshwar Engineering College, KA, IN.	Aug 2016 — May 2020
Bachelors of Engineering in Computer Science and Engineering.	

SKILLS

Languages	Java, Python, JavaScript, TypeScript, HTML, CSS
Frameworks & Tools	React.js, Next.js, Nest.js, Node.js, Spring Boot, Apache Kafka, Tailwind CSS, SASS, Git, Docker, Jenkins, CI/CD Pipelines, A/B Testing & Feature Flags, Agile/Scrum, Sentry, Figma
Cloud Services	AWS (EC2, S3, RDS, Lambda, CloudFormation), Microsoft Azure, Oracle Cloud Infrastructure
Databases	MySQL, PostgreSQL, MongoDB, Azure Data Studio
Testing & Monitoring	Jest, Playwright, CloudWatch, Grafana, Prometheus, Chrome DevTools
Networking & APIs	API Gateway, AWS VPC, Route 53, REST, GraphQL, WebSockets, Load Balancing, Latency Optimization, Network Telemetry

TECHNICAL EXPERIENCE

LendBuzz	Boston, MA
Frontend Engineering Co-op	Jan 2025 — Aug 2025
- Built scalable Spring Boot & Nest.js APIs for loan workflows, enabling secure data integration with financial systems - Developed a token validation service with Python/Flask, tested in Jest, deployed via AWS Lambda + CI/CD for scale - Designed and implemented a responsive GPS Access Page from Figma using Next.js, TypeScript, React Hooks, and TailwindCSS, applied UX patterns to improve usability for 100+ users - Developed a knowledge graph chatbot to automate loan eligibility checks, reducing manual underwriting time by 30% - Integrated Google Maps API for real-time geolocation, device tracking, and draggable UI, boosting user engagement by 30% - Instrumented applications with Sentry error tracking, alarms, and dashboards; reduced production issue resolution time - Optimized performance using Chrome DevTools, Lighthouse, WebVitals, cutting page load times and improving accessibility scores	
Northeastern University	Boston, MA
Software Development Research Assistant	Oct 2024 — Present
- Deployed Gemma 3.7B and Mistral 7B (Ollama) on NVIDIA Blackwell Pro GPU to build an end-to-end grading platform for exams and assignments with real-time inference and rubric-based feedback. - Optimized on-prem GPU inference pipelines using vLLM and RabbitMQ, achieving a 40% improvement in throughput and 30% lower latency for multi-model LLM applications. - Engineered a real-time monitoring dashboard in React/Next.js to visualize GPU utilization, queue latency, and network throughput across distributed nodes, reducing issue diagnosis time by 45%. - Integrated REST and WebSocket APIs with inference pipelines to enable low-latency network telemetry and health visualization, ensuring 99.9% uptime across connected services. - Developed AI AgentWorld, a multi-agent simulation platform with dynamic persona interactions powered by Qdrant, WebSockets, and MCP, improving interaction speed by 25%.	
NTT Data Services	Bangalore, IN
Information Technology Senior Associate	Jul 2021 — Aug 2023
- Led development of React/Next.js interfaces integrated with Spring Boot APIs, boosting task speed by 45%. - Built API gateway routing, error handling, and latency monitoring for distributed services. - Diagnosed and resolved production latency issues using log analytics and refactoring, improving API response time by 35%. - Collaborated in cross-functional Agile teams to deploy services through CI/CD pipelines with Jenkins and Docker, cutting deployment time by 30%.	

PROJECTS

Cloud-Native Microservices: GKE, Kubernetes, Docker Orchestration
- Orchestrated Kubernetes infrastructure on GKE using Helm Charts and CI/CD pipelines in Jenkins, enabling secure deployments through a Terraform-provisioned private EKS cluster. - Developed Custom Kubernetes Resources and CronJobs using Go-based Operators for automated workload management and event-driven scheduling. - Deployed Kafka on GKE via Helm Charts to implement asynchronous publish/subscribe messaging across microservices, improving event throughput and reliability by 40%.
ChatGPT Clone with Multi-LLMs
- Created a responsive Material UI + React chat interface, integrating 5 LLMs to boost query flexibility by 10% - Built a high-performance Node.js-Express-MongoDB system to streamline LLM responses, reducing latency by 50%
