

SUMMARY

Frontend Engineer with 3+ years building responsive, AI-powered web applications using React, Next.js, and TypeScript across fintech and AI platforms. Specialized in performance optimization, scalable state management, and component systems by delivering polished, accessible user experiences from Figma to production.

TECHNICAL EXPERIENCE

Lendbuzz Inc. Boston, MA
Frontend Engineering Co-op Jan 2025 — Aug 2025

- Built **GPS Access Page** from **Figma** using **Next.js**, **TypeScript**, **React Hooks**, and **TailwindCSS**, improving usability for 100+ users.
- Integrated **Google Maps API** with real-time geolocation and draggable UI, increasing user engagement by 30%.
- Optimized performance via **Chrome DevTools**, **Lighthouse**, and **Web Vitals**, cutting page load times and boosting accessibility scores.
- Architected **Redux state management** for multi-step loan workflows, reducing re-render cycles and improving UI consistency.
- Instrumented frontend with **Sentry** error tracking and custom dashboards, reducing production issue resolution time.
- Migrated **token validation** from **Ruby on Rails** to **Next.js/Nest.js** deploying **Storybook-documented components** via **AWS Lambda** with **Jest** coverage.

Northeastern University - DMSB AI Strategic Hub Boston, MA
Software Development Research Assistant Sep 2024 — Dec 2024; Sep 2025 — Dec 2025

- Built **Voice Coach AI**, **React.js** frontend with **Whisper ASR** for real-time **speech-to-text** feedback, improving student engagement by 45%
- Developed **AI AgentWorld React + Node.js** chat interface with **RAG-powered semantic search** using **Qdrant vector database** and streaming LLM responses, improving interaction speed by 25%
- Designed AI-powered **essay grading interface** with **React.js** integrating LLM evaluation and **rubric feedback**, improving efficiency by 60%
- Deployed Gemma and Mistral 7B on **AWS GPU instances** to build real-time grading platform with **rubric-based feedback**
- Optimized GPU inference pipelines using vLLM and RabbitMQ, achieving 40% throughput and 30% **latency improvement**

NTT DATA Bangalore, IN
Information Technology Senior Associate Jul 2021 — Aug 2023

- Led development of **React/Next.js** enterprise interfaces integrated with Spring Boot APIs, boosting task completion speed by 45%
- Built and maintained **component libraries and design system** elements, ensuring UI consistency across multiple product teams
- Diagnosed frontend performance issues using **log analytics and code refactoring**, improving **API rendering** time by 35% and reducing deployment time by 30%

PROJECTS

ChatGPT Clone with Multi-LLM Support | *React, Material UI, Node.js, Express, MongoDB*

- Created responsive Material UI + React chat interface supporting 5 LLMs with dynamic model switching and real-time streaming responses
- Built scalable **Node.js-Express-MongoDB** backend with connection pooling and query optimization, reducing response latency by 50%
- Implemented **WebSocket** communication for streaming LLM responses, enabling real-time conversational **UX across multiple AI models**

LinkedIn Clone – AI Recommended Jobs | *React, Node.js, RESTful APIs, LLM*

- Developed full-featured **job portal with React.js** frontend featuring authentication, job feeds, and messaging, achieving **2x user interface** performance improvement through memoization
- Built **LLM-powered recommendation engine** with vector similarity matching, improving candidate-job match accuracy by 40%

CineGenie – AI Movie Ticketing App | *React, Node.js, MongoDB, AWS S3, AWS EC2*

- Developed **AI-powered movie ticketing app** with personalized recommendation components, achieving 2x user engagement
- Integrated **AWS S3** for media delivery, **reducing media load times** by 50%, hosted on **AWS EC2**

SKILLS

Frontend	React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Sass/SCSS, Angular, Redux, Figma, TanStack Query (React Query), Webpack, Vite, Storybook
Performance & Testing	Chrome DevTools, Web Vitals, Playwright, Jest, React Testing Library, A/B Testing, Feature Flags, Sentry
Backend & APIs	Node.js, Express.js, Nest.js, Spring Boot, RESTful APIs, GraphQL, Python, Java, RAG Systems, Vector DB
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda, CloudFormation), Microsoft Azure, Oracle Cloud, Docker, Kubernetes, Helm, Terraform, Jenkins, Git, CI/CD
Databases	MySQL, PostgreSQL, MongoDB

EDUCATION

Northeastern University Sept 2023 — Dec 2025
Master of Science in Information Systems GPA 3.8

Coursework: Web Design & UX Engineering, UX Design & Testing, Data Science & Engineering Methods, Program Structure & Algorithms, Application Engineering & Dev, Object-Oriented Design

Basaveshwar Engineering College, KA, IN. Aug 2016 — May 2020
